The QS1 ..Safeguarding Your IT Equipment !

We are proud to introduce the QS1, the Flagship in a series of transport cabinets designed with the safety of your IT equipment in mind. The QS1 represents our commitment to delivering top-quality protection during transport with the objective to provide maximum protection for your sensitive equipment all the way to it´s destination.

QS1 *(outer dim. H x W x D :190x120x60 cm)*

The QS1 is the result of our dedication to precision design and tailored solutions. Every aspect of this transport cabinet has been meticulously considered to meet your needs. We understand that two transports are never alike, therefore we made the QS1 fully customizable to ensure it fits your IT equipment perfectly.

QPOD

Protective coating

Inside the QS1, you'll find integrated straps, a soft rubber mat on all shelves, and padded walls inside the rigid sheet metal walls. This, combined with a robust frame construction that protects the sheet metal from scratches, ensures that your IT equipment is protected whether the cabinet is subjected to shocks, vibrations, or abnormal tilting

QS1

The QS1 is designed to make transport as smooth as possible. Easy-to-manage lockable wheels and ergonomic handles make moving the cabinet a breeze, while two lockable front doors ensure the integrity of your equipment. With the QS1 in your entourage, you can rest assured that your IT equipment will reach its destination without a scratch.
